**Email:** [josiahaideleje2@gmail.com](mailto:josiahaideleje2@gmail.com) | **Phone:** +234 7042135690 | **Location:** Portharcourt, Nigeria

**Projects:** <https://josiah-portfolio1.vercel.app/>

---

## Professional Summary

Product-Focused Full-Stack Developer with 2+ years of experience building engaging, scalable web applications. Specialized in modern frontend development with React, Next.js, TailwindCSS, and Framer Motion, with strong expertise in building seamless, responsive user interfaces and smooth animations.

Currently pursuing a B.Sc. in Computer Science at Landmark University, maintaining a First-Class academic standing.

---

## Technical Skills

**Languages:** JavaScript, TypeScript, HTML, CSS, Python

**Frontend:** React, Next.js, TailwindCSS, Framer Motion, Responsive Design, Animation

**Backend & Databases:** Node.js, Supabase, MySQL

**Tools & Technologies:** Git, GitHub, VS Code, Vercel, Netlify

---

## Professional Experience

**FREELANCE WEB DEVELOPER | Remote**

**2024**

- Developed a custom e-commerce web application for client using modern web technologies
  - Leveraged open-source solutions to meet tight project deadlines while maintaining quality standards
  - Delivered fully functional web application with responsive design and user-friendly interface
- 

## Projects

### E-Commerce Platform | 1 Month Development

**GitHub:** <https://github.com/Eragbai2001/Prisma-Ecommerce-website->

**Live Demo:** <https://prisma-ecommerce-website.vercel.app/login>

Full-stack e-commerce web application built with **Next.js 14**, **TypeScript**, and **Prisma ORM**. Features a comprehensive **admin dashboard**, customer-facing storefront, and modern authentication system.

Implements **product management**, **order processing**, **payment integration**, and **email verification**.

Customizations include:

- Advanced product categorization
- Automated inventory management
- Custom checkout flow
- Integrated blog system

## Mock CBT Software | 2+ Months Development

A mock Computer-Based Test (CBT) application developed for **Landmark University**. Simulates real exam conditions using past questions, helping students reduce anxiety and prepare effectively. Built with a **user-friendly interface**, **real-time performance tracking**, and **detailed analytics** to pinpoint strengths and weaknesses.

## Personal Portfolio Website | 3 Weeks Development

**GitHub:** <https://github.com/Eragbai2001/Josiah-portfolio>

**Live Demo:** <https://josiah-portfolio1.vercel.app/>

A modern, interactive portfolio built with **Next.js 15**, **Framer Motion**, and **TypeScript**. Highlights include:

- Smooth scroll animations and dynamic project displays
- Animated SVG contact form with EmailJS integration
- Innovative horizontal project slider
- Fully responsive and mobile-optimized design

Inspired by Vercel's clean design philosophy and Apple's interaction principles.

---

## Achievements & Leadership

### HACKATHON WINNER | Alpinist Hackathon - Landmark University | 2024

- Led a development team to **1st place victory** in university-wide hackathon competition
- Demonstrated leadership, problem-solving, and technical expertise under pressure
- Successfully coordinated team efforts to deliver innovative solution within tight deadline

### TOP 5 FINALIST | HackFest - Landmark University | 2024

- Secured top 5 position among competing teams in prestigious university hackathon
- Showcased advanced technical skills and collaborative teamwork abilities
